

AUGEO CRYSTAL

RHODIA OPERATIONS declares that **AUGEO CRYSTAL** is obtained from the acetalization reaction of glycerin.

In the context of the European Regulation N°1223/2009, recast of the Cosmetic Products Directive 76/768/EEC and its subsequent amendments, a prohibition of animal testing for finished cosmetic products and for cosmetic ingredients was laid down since 2004 and 2009 respectively (testing ban). Regarding marketing ban a rigid time frame relating to the application of non-vertebrate animal alternative methods instead of vertebrate-animal testing was determined for the safety evaluation of cosmetic ingredients. For these ingredients, it imposed a ban on studies carried out on vertebrate animals since 11 March 2009 and on repeated dose toxicity, toxicokinetics and reproduction toxicity tests since 11 March 2013.

RHODIA POLIAMIDA E ESPECIALIDADES S.A. declares that testing of **AUGEO CRYSTAL** on vertebrate animals has been sponsored after 2009. These tests were required to the registrants for fulfilling their obligations for the preparation of a dossier under REACH Regulation N°1907/2006. The product categories supported in this dossier are:

- × Biocidal Products (PC8)
- × Washing and Cleaning Products (PC35)
- × Air Care Products (PC3)
- × Polishes and wax blends (PC31)
- × Perfumes, Fragrances (PC28)

Therefore animal testing has not been carried out in order to meet the requirements of the Directive 76/768/EEC or Regulation N°1223/2009 on cosmetic products.

AUGEO CRYSTAL – TEST ON ANIMALS

Above statement is valid for **AUGEO CRYSTAL** manufactured in Paulínia (Brazil)

Information given above corresponds to the current status of our knowledge
